

ORTHOPAEDICS 2022-2023

THUASNE GROUP

is over 170 years old

From its Saint-Etienne base, THUASNE Group has been drawing on its know-how for more than 170 years to conceive, develop and manufacture medical devices enabling all patients and consumers to become active players in their own health.

Derived from the shared history of 6 generations of entrepreneurs, THUASNE offers concrete, simple, adapted and innovative health solutions for improved mobility, in more than 85 countries. Our expertise is aimed at patients in the fields of orthopaedics (belts, braces), medical compression (phlebology, lymphology, wound healing), women's health (external breast forms, lingerie) and homecare.

With its operations spanning the worlds of medicine, materials and digital technology, Thuasne creates and distributes medical devices enabling all patients and consumers to become active players in their own health. Year after year, our joint commitment enables better management of numerous chronic conditions (back problems, musculoskeletal disorders, venous insufficiency, lymphoedema, etc.) using non-invasive therapeutic solutions

Elizabeth Ducottet Chairman and CEO

trolete busting.

THUASNE today is...

2 200 employees around the globe

A presence in **85 countries**

14 industrial sites in Europe and the United-States

22 000 professional customers

30 to 40 new product references every year

One Thuasne brace sold every **2 seconds** somewhere in the world

15 millions kilometres of knitted thread

5,000 km of fabric produced/year

The

«Made in Thuasne» label

The capacity to fully control every step in the value chain

Because THUASNE is committed to offering patients and health professionals effective, high-quality products, it can guarantee that all its products are designed, made and distributed using technologies mastered by the Group following extensive experience accumulated over the years.

Conceive Create Manufacture Control Supply Deliver.

Knitting expertise for the benefit of patients

Because THUASNE is committed to patients, its knitted braces are designed using exclusive expertise to promote efficacy, comfort and compliance.

They are **effective** thanks to their compressive properties, restoring proprioception and improving the blood circulation.

They are **comfortable** thanks to their breathability and specific knit (different techniques and comfort zones).

Integrated silicone knit for good support

Ventilated knit for better breathability

Tight, dense knit for a compressive effect and improved resistance

Non-compressive tab for easy fitting

Less compressive "accordion" knit for freedom of movement

Lighter, compression-free knit, for enhanced comfort behind the knee, at the elbow crease, etc...

All the medical devices mentioned in this document are CE marked according to the Regulation 2017/745 on medical devices, unless specifically identified as "NOTCE MARKED". Products mentioned in this document are CE class I. Please contact Thuasne should you need any additional information on devices classification. Please carefully read the instructions for use, indications and contraindications of the product. The medical indications for the products are available on certain product pages or summarised on the following product pages: pages 10, 26, 44, 62, 70. The contraindications or precautions for use, where relevant, are also specified for each medical device.

MEASUREMENTS

BACK

Measure the waist circumference at the level of the navel

Measure the hip circumference

NECK

Measure the neck circumference

Measure the neck height, head upright, from the trachea to the chin

SHOULDER - ELBOW

Measure the circumference under the chest with the injured arm.

Measure the arm circumference at the biceps level.

Measure the X cm circumference under the elbow

WRIST - FINGERS

Measure the circumference of the wrist

Measure the width of the hand at the level of the metacarpals

Measure the circumference of the index finger at the base of the nail

Measure the distance between the tip of the injured finger and the wrist

KNEE-CALF

Measure the circumference of the knee in the middle of the patella, knee in slight flexion.

Measure the circumference of the calf 25 mm below the fibular head

Measure the circumference of the thigh at the highest point or \boldsymbol{X} cm above the knee.

Measure the width of the knee

Measure calf circumference Y cm below the knee.

Measure the size

Measure the circumference of the thigh X cm above the knee and the calf circumference Y cm below the knee.

Measure the floor-to-groin height

ANKLE - FOOT

Measure the circumference of the ankle above the malleoli

Measure the short heel circumference

Foot length

Shoe size (UK)

BACK

LUMBAR BELTS: KEY BENEFITS

1 Relieve the lumbar zone
Increase in intra-abdominal pressure

Pain-relieving effect due to compression

Better distribution of load on intervertebral discs

Promote a pain-relieving position (posture correction) and limit extreme, painful movements

Aid early remobilisation and reduce apprehension about everyday activities

Did you know?

is the number of times our backs have to work every day.1

80%

of the population will suffer from low back pain once in their lifetime.²

Staying Active is the recommended treatment by the NHS for lower back pain 3

^{1:} The median number of spinal movements performed within 24 h was approximately 4,400 . source :Rohlmann A, Consmüller T, Dreischarf M, Bashkuev M, Disch A, Pries E, Duda GN, Schmidt H. Measurement of the number of lumbar spinal movements in the sagittal plane in a 24-hour period. Eur Spine J. 2014 Nov;23(11):2375-84. doi: 10.1007/s00586-014-3588-0. Epub 2014 Sep 20. Last revision date: 06/2021 Ref: 2105180

LombaFirst

Lumbar support belt

0876 02 (21 cm) - 0875 02 (26 cm)

Indicated for

Non-specific Low Back Pain (acute, subacute, chronic phases).

Lumbar stenosis.

🏷 POINTS TO REMEMBER

Discreet and lightweight back brace thanks to its thin fabric and seamless sewing technology

Strong support for an efficient analgesic effect* thanks to the conformable spring-loaded steel stays

Additional strap to reach a higher compression

Finger loops for an easy fitting

Designed angles(1) for more comfort while wearing the belt

Waist circumference

Colour: Black

LombaStart

Lumbar support belt

0874 02 (21 cm) - 0873 02 (26 cm)

Indicated for

Non-specific Low Back Pain (acute, subacute, and chronic phases). Spinal Stenosis

🏷 POINTS TO REMEMBER

Discreet and lightweight back brace thanks to its thin fabric and seamless sewing technology

Strong support for an efficient analgesic effect* thanks to the conformable spring-loaded steel stays

Additional strap to reach a higher compression

Finger loops for an easy fitting

Designed angles at hips and ribs area for more comfort while wearing the belt.

Colour: Black

Presentation video available online

⁽¹⁾ Less material at hips and ribs area * internal data

LombaSkin

"Second skin" compact lumbar support belt

0871 03 (21 cm) - 0870 03 (26 cm)

Indicated for

Non-specific Low Back Pain (acute, subacute, chronic phases).

Lumbar stenosis

Target patient

Low back pain sufferer with moderate physical activity e.g. sedentary office worker

POINTS TO REMEMBER

Comfortable to wear thanks to the "second skin effect" especially at the rib and hips area

Discreet and lightweight back brace thanks to its thin fabric and seamless sewing technology

Strong support for an efficient analgesic effect* thanks to the conformable spring-loaded steel stays

Specific elastic fabric ensures comfortable feel

Designed angles² for more comfort while wearing the

Easy care: machine wash at 30°C

Colour: Black

120 - 140 cm

LombaTech®

Adaptable, reinforced lumbar support belt

0852 02 (21 cm) - 0851 03 (26 cm)

Indicated for

Non-specific Low Back Pain (acute, subacute, and chronic phases) Spinal Stenosis

Target patient

Patient with varied activities or an atypical body shape

🏷 POINTS TO REMEMBER

- 1-Adaptation to the body's movements: removable additional strap
- 2 Precise targeting of painful area: additional strap
- **3 Breathability**: moisture wicking thanks to Combitex fabric¹ and Coolmax lining
- 4 Coverage of a broad range of sizes: to fit as many patients as possible (very slim, large hips, round stomach, etc.)
- 5 Easy Care: machine wash at 30 °C

Waist circumference

Colour: Grey

Presentation video available online

LombaMum®

Posture-correcting medical maternity belt

0805 01

indicated for

Pregnancy-related low back pain. Pregnancy-related girdle pain (posterior pelvic pain, sacro-iliac pain, symphyseal pain)

POINTS TO REMEMBER

- **1 Adjustable throughout the pregnancy**: 2 abdominal support bands
- **2 Adjustable support**: adjustable additional straps
- **3 Comfort**: bamboo fibre lining
- 4 Easy care: Machine wash at 30 °C

Waist circumference

Pelvic belt 2740 01

Indicated for

Pregnancy-related pain girdle (posterior pelvic pain, sacro-iliac pain, symphyseal pain).

POINTS TO REMEMBER

Adjustable extra-strong support: elastic fabric and additional strap

Comfort: soft terry lining

Easy care: machine wash at 30 °C

Waist circumference

Colour: White

LombaStab

Lumbar support belt with an easy and precise tightening system

0854 02 (21 cm) - 0853 02 (26 cm)

LombaStab high

Dorso-lumbar support belt with an easy and precise tightening system

0855 01 (35 cm) / 0856 01 (40 cm)

Indicated for

Non-specific low back pain (acute, subacute and chronic phases)

Target patient

Persons looking for an easy and precise tightening to adapt it according to their pain. Persons in prolonged standing position. People lacking strength

🏷 POINTS TO REMEMBER

- 1 Easy and precise tightening¹ thanks to the innovative lacing system
- 2 Strong support for an efficient analgesic effect* thanks to the back-plastic plates and the adaptable spring steel stays
 - Adaptable to the anatomy in A or V-Shape thanks to the innovative quick lacing system and the smart designed angles at hips and ribs area
- 3 Symmetrical hand loops to ensure the belt is properly centered on the spine
- 4 Washable at 30°C

Indicated for

Non-specific low back pain (acute, subacute and chronic phases) Lumbar-spinal stenosis Spondylolysis.

Persons looking for an easy and precise tightening to adapt it according to their pain. Persons in prolonged standing position. People lacking strength.

POINTS TO REMEMBER

Easy and precise tightening¹ thanks to the innovative lacing system

Strong support for an efficient analgesic effect* thanks to the back-plastic plates and the adaptable spring steel stays

Specific elastic fabric to reach the desired level of compression and to ensure a good breathability

Adaptable to the anatomy in A or V-Shape thanks to the innovative quick lacing system and the smart designed angles at hips and ribs area

Symmetrical hand loops to ensure the belt is properly centered on the spine

Washable at 30°C

* internal data (1) Study conducted in-house on a panel of 13 people, July 2019

LombaStab immo

Dorso-lumbar support belt with corset and an easy and precise tightening system

0859 01

New

Indicated for

Non-specific low back pain (acute, subacute and chronic phases);

Spinal stenosis

Spondylolysis

Postoperative immobilisation

MODIC type 1

🏷 POINTS TO REMEMBER

Easy and precise tightening1 thanks to the innovative lacing system

Strong support for an efficient analgesic effect* thanks to the back-plastic plates and adaptable back spring steel

Specific elastic fabric to reach the desired level of compression

Smart designed angles at hips and ribs area to ensure sitting and standing position comfort while wearing the belt.

Symmetrical hand loops to ensure the belt is properly centered on the spine

35 cm

Thermoformable corset

Washable at 30°C

Thoraco-lumbar support belt with an easy and precise tightening system

0847 01

LombaStab dorso

Indicated for

Non-specific low back pain (acute, subacute and chronic

Static disorders (kyphosis, lordosis)

Stable vertebral fracture (traumatic, osteoporotic)

Scheuermann's disease

Target patient

Patients with a waist size of between 60 and 140 cm

TO REMEMBER

3 flexion points thanks to the intra-abdominal pressure and the sternal support maintaining the body in a hyperextension

Easy and precise tightening¹ thanks to the innovative lacing system

Adaptability to the curvature of the spine thanks to the conformable and height-adjustable back splint.

Comfortable S-Shaped and padded shoulder strap preventing armpit friction.

Easy backpack design to facilitate application and tightening of the shoulder straps.

Specific elastic fabric to reach the desired level of compression and to ensure a good breathability

Waist circumference

Colour: Black/Dark Blue

Sleeg® Flex **Universal TLSO**

U50401004001

Indicated for

Mild to moderate osteoporosis / compression fractures. Postural issues and kyphosis.

Chronic or acute low/mid back pain / osteoarthritis / degenerative disc disease / bulging or herniated disc /low-mid back sprains and strains / lumbar and trunk muscle weakness.

🏷 POINTS TO REMEMBER

One size fits all - Easy universal sizing technology fits waist sizes 26 - 57".

Semi-rigid comfort enhancing design.

Highest quality breathable materials.

Ventilated self-moulding support panels.

Wings can be angled and optimized to fit all body types.

Easy to Apply & Wear.

Available extension panel accommodates waist sizes 57 - 65" code UU50401001001.

Sleeg® MAX

Premium Post-Op/Post-Injury TLSO

U50401007001

Indicated for

Postoperative vertebral stabilisation/fusion. Stable vertebral fractures.

Mechanical or discogenic thoracic/lumbar & extremity pain. Degenerative disc disease. Post-injury to facilitate healing. Spondylolysis, spinal stenosis. Spondylolisthesis, spondylosis, laminectomy, discectomy, facet syndrome, spinal muscle weakness, arthritis, low back sprains and strains, prophylactic back support.

> POINTS TO REMEMBER

One size fits all - Easy universal sizing technology fits waist sizes 26 - 57".

Rigid Tri-Planar Control: sagittal/coronal/transverse plane motion restriction.

Increased intracavitary pressure to reduce spine & disc loading.

Easy to Apply & Wear.

Steel sternal bar & reinforced panels.

Wings can be angled and optimized to fit all body types.

Available extension panel accommodates waist sizes 57 - 65" code UU50401007001.

BOA Dual TLSO

U50301

Indicated for

Sagittal, coronal, transverse plane motion restriction / increased intracavitary pressure to reduce spine and disc loading / mechanical or discogenic thoracic / lumbar and extremity pain / post-operative spinal stabilization / fusion / degenerative disc disease / post-injury to facilitate healing / spondylolysis / spinal stenosis / spondylolisthesis / spondylosis laminectomy / discectomy / facet syndrome / spinal muscle weakness / arthritis / low back sprains, strains / prophylactic back support.

POINTS TO REMEMBER

Full-circumferential rigid support for the thoracolumbar spine.

Patentend Lacer Design Compression System.

Simple pull straps for easy tightening and adjustment.

Waist circumference

DorsoRigid 35

Immobilising spinal hyper-extension brace

0890 02

Indicated for

Post-operative immobilisation after spinal surgery. Reduction and stabilisation of vertebral fractures with preservation of the posterior wall (T10 \boxtimes 1/L2). Conservative treatment for stable vertebral fractures of the spine (T10- \boxtimes 1/L2).

Osteoporotic or metastatic-related compression fractures of the thoracic spine and the dorsolumbar transition (T10-1/L2).

Osteomalacia with fractures.

Dorsolumbar osteoarthritis. Osteoporosis and degenerative metastases of vertebral bodies

POINTS TO REMEMBER

Resting and static posture correction of the spine thanks to a stabilising and immobilising action, based on three pressure points

Rust-proof and adjustable

Water-resistant, can be worn in the swimming pool for physiotherapy sessions, for example

3 98 - 110 cm **4** 111 - 125 cm

NECK

CERVICAL COLLAR: KEY BENEFITS

Cervical collars immobilise the cervical spine, limiting flexion, extension and rotation movements.

They act on several levels:

- Pain-relieving effect
 - By limiting movements and painful mechanical stresses
- Relaxing effect By increasing local heat, thereby promoting muscle relaxation
- Limitation/immobilisation of the cervical spine Varies depending on the degree of rigidity
- Stimulation of proprioception By reinforcing control sensations from the spinal column

Did you know?

suffer from neck pain 1-2 The neck is one of the areas of the body most affected by repetitive strain injuries in the office³

20% 114 of all people with an office job

complain of neck pain 4

People who play contact sports (football, boxing, hockey, etc.) are also commonly affected⁵

body fractures (without neurological symptoms

> POINTS TO REMEMBER

Reinforced support: rigid perforated polyethylene structure

Comfort: padding of the edges in contact with the skin, perforations for better ventilation, chin support

Hold: self-fastening adjustment

Anatomical fit: height-adjustable from 9 to 13 cm

🏷 POINTS TO REMEMBER

One hand adjustment system for enhanced ease of use for the patient

Anatomically shaped with rigid frame to provide strong support and reinforced immobilisation of the cervical vertebra

Five-steps chin height for precise adiustments

Light weight and comfortable foam pads to deliver an increased comfort

Modern and sober design

🏷 POINTS TO REMEMBER

Sternal extension for reinforced occipital immobilisation and stabilization

One hand adjustment system for enhanced ease of use for the patient

Anatomically shaped brace with rigid frame to provide strong support and reinforced immobilisation of the cervical vertebra

Five-steps chin height for precise adjustments

Light weight and comfortable foam pads to deliver an increased comfort

Modern and sober design

40 - 46 cm

Single size Colour:

SHOULDER - ELBO

Did you know?

14 to 20% of the population

say they are suffering from shoulder pain on any given day 1

The shoulder is one of the areas of the body most affected by repetitive strain injuries (RSI), particularly rotator cuff tendinitis.

Collar bone fracture:

Children are the most affected (almost half of all collar bone fractures), followed by men under the age of 30, due to sports injuries²

SHOULDER IMMOBILISERS & ARM SLINGS: **KEY BENEFITS**

Thuasne shoulder braces can be modular, depending on the models, and accompany patients from the post-traumatic or post-operative immobilisation phase right through to rehabilitation and recovery. There are two different types of immobilisation:

- Immobilisation in neutral position ("Elbow-to-body") following trauma or surgery
- Functional immobilisation for rehabilitation and gradual resumption of shoulder movement and/or function

The physician decides on the immobilisation duration on the basis of the severity of the trauma, its nature and the type of associated damage.

Prolonged strict immobilisation can have significant consequences, such as stiffness. It is for this reason that the initiation of a gradual, adapted rehabilitation programme designed to restore pain-free, unrestricted function is recommended*.

ImmoClassic

Scapulo-humeral immobilisation

2445 01

ImmoVest

Scapulo-humeral immobilisation vest

244102

Indicated for

Shoulder and/or elbow injuries or inflammatory conditions. Conservative treatment for non-surgical proximal humeral fractures.

Shoulder dislocation.

 $Post-operative\ immobilisation\ (such as\ after\ rotator\ cuff\ surgery$ or dislocation reduction...).

Shoulder subluxation or dislocation prevention (joint instability). Support for paralytic upper limb.

Indicated for

Uncomplicated shoulder injuries:

- anterior dislocation of the shoulder,
- non-displaced, non-articular fracture of the scapula,
- uncomplicated acromioclavicular dislocation ("separated shoulder").

Immobilisation of the elbow following dislocation.

Fractures of the greater tuberosity of the humerus, humeral head or lesser tuberosity of the humerus (non-surgical indica-

Immobilisation following surgery to correct instability.

Rotator cuff rupture in the acute phase.

Acute scapulohumeral periarthritis ("frozen shoulder").

Paralysis of the brachial plexus.

Re-education of the scapulohumeral joint.

Pain-relieving immobilisation of the shoulder after the inflammatory phase (acute rheumatism, rheumatoid arthritis).

> POINTS TO REMEMBER

Scapulohumeral immobilisation: sleeve and additional strap to support the forearm and shoulder

Adaptability: adjustable upper strap

Comfort: protective foam on the shoulder and neck

POINTS TO REMEMBER

Immobilisation of the shoulder and elbow: in neutral position thanks to the 3 straps

Reinforced protection: high coverage vest

Comfort: anatomically shaped breathable fabric and comfort pad on the shoulder

Easy to fit: numbered and coloured marking system

Colour: Black

Colour: Black

Immo

Immobilisation vest with forearm and hand bands

2440 01

Ligaflex® clavicular straps

Clavicular immobilisation strap

2450 02

Indicated for

Analgesic immobilisation of the shoulder, arm and forearm following: Non-surgical shoulder and elbow injuries (dislocations or

sprains).

Årm muscle injuries.

Non-surgical shoulder and elbow bone injuries.

Shoulder tendon injuries.

Indicated for

Displaced or non-displaced clavicle fractures.

POINTS TO REMEMBER

Immobilisation of the elbow against the torso through its reinforced belt and support bands

Better comfort thanks to the belt that supports the arm, no pressure on the shoulder and neck

Easy for the patient to put on with its self-fastening attachment

POINTS TO REMEMBER

Adaptability: one size fits all with trimmable straps to fit all morphologies

Comfort: dorsal foam anchoring pad and quilted straps

Easy to fit: buckle closure

Single size / Colour: Black

Colour: Black

Silistab[®] Epi

Anti-epicondylitis brace

2305 03

Indicated for

Insertion epicondylitis (tennis elbow) and epitrochleitis (functional

treatment).

Prevents against future recurrence and gives active support for sports

activities.

Ideal for manual work situations.

🏷 POINTS TO REMEMBER

Proprioception: anatomical compressive knit and adjustable pressure thanks to the additional removable strap

Comfort: silicone inserts and anatomical knit with comfort areas on the epicondyles

Easy to fit: visual markers at the hollow and tip of the elbow for precise positioning.

Practical: pull tabs for ease of application

WRIST-THUMB

FUNCTION OF SPLINTS

WRIST SPLINT

Varying degrees of immobilisation of the carpometacarpal joints. Used mainly for sprains, wrist instabilities, tendinitis of the wrist, carpal tunnel syndrome that has not undergone surgery and during the postoperative phase.

WRIST/THUMB SPLINT

Varying degrees of immobilisation of the carpometacarpal joints and the thumb. Used in the event of trauma (sprains and fractures), wrist and thumb instabilities, tendinitis of the wrist and De Quervain's tenosynovitis, basal joint arthritis of the thumb and during the postoperative phase.

THUMB SPLINT

Stabilisation of the thumb in the required therapeutic position. Mainly used in basal joint arthritis of the thumb or thumb sprains.

WRIST-FINGER SPLINT

Varying degrees of immobilisation of the metacarpophalangeal and interphalangeal joints

Used in the event of sprains, dislocations, non-displaced fractures or in the post-operative phase.

Did you know?

Carpal tunnel syndrome, due to median nerve compression, represents almost all repetitive strain injuries of the wrist! It is caused by repeated flexion/extension movements, tight gripping, pressure on the palm and vibrations (vibrating tools), etc...

are affected by carpal tunnel syndrome. In this case, the trigger is fluid retention, causing the tissues to swell and compress the median nerve.

is the number of wrist fractures every year,

Sport is also one of the biggest causes of injury. For example, 3/4 of all handball

Ligaflex® Action

Flexible wrist stabilising brace with removable palmar stay

Indicated for

Wrist sprain.
Post-operative, post-traumatic residual pain and/or oedema.
Wrist tendinopathies.
Wrist osteoarthritis.

POINTS TO REMEMBER

Modular support: conformable and removable palmar stav

Proprioception: Compressive knit and additional removable strap to increase the pressure in the pain area

Comfort: silicone insert on the ulnar condyle. Anatomical and elastic knitting

Colour: Grey

Ligaflex® Classic

Wrist immobilisation splint

2435 02

Indicated for

Wrist sprain.

Non-surgical wrist fracture.

Post-operative or post-traumatic wrist immobilisation.

Wrist tendinopathies.

Conservative treatment of carpal

tunnel syndrome.

Lateral epicondylitis.

Rheumatoid arthritis.

Wrist osteoarthritis.

TARGET PATIENT

Patient without oedema

POINTS TO REMEMBER

Strict immobilisation of the joint: rigid, anatomical and conformable palmar stay

Comfort: soft and breathable 3D knit for prolonged wear

Colour: Black

Ligaflex® Manu

Wrist and thumb immobilisation splint

2430 02

Indicated for

Thumb sprain.

Wrist and/or thumb sprain.

Non-surgical scaphoid fracture.

Non-surgical wrist fracture.

Post-operative or post-traumatic wrist/thumb immobilisation.

Wrist and/or thumb tendinopathies.

De Quervain tenosynovitis.

Rheumatoid arthritis.

Lateral epicondylitis.

Conservative treatment of carpal tunnel syndrome.

Thumb/wrist osteoarthritis.

Neuro-muscular impairments (contracture, hand drop or spasticity...).

POINTS TO REMEMBER

Immobilisation of the wrist and thumb via 2 rigid, malleable and anatomical palmar stays

Aerated, foam lined fabric

Dual strap system ensuring even compression

Ligaflex® pro

Wrist immobilisation splint with quick lacing system

Indicated for

Wrist sprain

Non-surgical wrist fracture.

Post-operative or post-traumatic wrist immobilisation. Wrist tendinopathies.

Conservative treatment of carpal tunnel syndrome.

Lateral epicondylitis.

Rheumatoid arthritis.

Wrist osteoarthritis.

POINTS TO REMEMBER

- **1 Easy and quick to put on**: Quick lacing system
- 2 Firm support: conformable palmar stay on the palm of the hand
- **3 Comfortable and breathable**: soft, protective jersey lining and breathable 3D knit

Colour: Grey

Ligaflex® pro +

Wrist and thumb immobilisation splint with quick lacing system

2434 02

Indicated for

Thumb sprain.

Wrist and/or thumb sprain.

Non-surgical scaphoid fracture.

Non-surgical wrist fracture.

Post-operative or post-traumatic wrist/thumb immobilisation.

Wrist and/or thumb tendinopathies.

De Quervain tenosynovitis.

Rheumatoid arthritis.

Lateral epicondylitis.

Conservative treatment of carpal tunnel syndrome.

Thumb/wrist osteoarthritis.

Neuro-muscular impairments (contracture, hand drop or spasticity...).

POINTS TO REMEMBER

Easy and quick to put on: Quick lacing system

Firm support for thumb and wrist: 2 conformable palm stays

Comfortable and breathable: soft, protective jersey lining and breathable 3D knit

2 models: right and left

1 13 - 15 cm 2 15,5 - 17,5 cm 3 18 - 20 cm 4 20,5 - 23 cm

Colour: Grey

Basal joint arthritis

For night-time use, recommend Ligaflex® pro + to reduce muscle tension and relieve pain.

Ligaflex® Rhizo Pro

Thumb splint

T4802732

Indicated for

Thumb sprain.

Immobilisation in case of pain or trauma of the thumb. Post-operative immobilisation.

POINTS TO REMEMBER

Efficacy of the thumb immobilisation: rigid plastic shell over the thumb

Comfort: perforated shell with soft ventilated fabric lining

Ease of use: easy to put on with wide strap at the wrist **Universal product**

a contract	13 - 17 cm
	13 - 17 CIII
2	17 - 23 cm
_	17 - 23 (111

Colour: Black

Ligaflex® Rhizo

Static thumb splint in analgesic position

7090 02

Indicated for

Immobilisation in case of pain or trauma of the thumb. Post-operative immobilisation.

Thumb osteoarthritis (including rhizarthrosis).

POINTS TO REMEMBER

- 1 Immobilisation in a painless position: metal frame
- **2 Comfort**: opening at the thumb to prevent any pressure on the painful zone
- **3 Freedom of movement**: preserves gripping and pinching movements and range of motion of the wrist
- 4 Breathable: breathable 3D knit
- 2 models: right and left

Colour: Grey

Presentation video available online

Rhizarthrosis

For daytime use, recommend Ligaflex® Rhizo to reduce muscle tension and relieve pain.

Ligaflex Finger®

Wrist and finger immobilisation splint 2nd, 3rd or 4th metacarpals

2432 02

Ligaflex Boxer®

Immobilisation splint wrist, hand, fingers 4th or 5th metacarpals

2431 02

Indicated for

Finger injuries (sprains, dislocations, ligament ruptures...) Post-traumatic immobilisation.

♦ POINTS TO REMEMBER

Modular immobilisation thanks to conformable stays for:

Troduction thanks to comormable stays for

- Immobilisation of metacarpal-phalangeal joints (A)
- Immobilisation of interphalangeal joints (B)

Adaptability and support 4 straps (2 fixed and 2 removable) and 2 immobilisation possibilities (palmar or dorsal) according to the prescriber's recommendations

 $\textbf{Comfort:} \ \ \textbf{Protected injured fingertips and specific cutting of the wrist strap}$

Presentation video available online

Indicated for

Non-surgical 4^{th} and 5^{th} metacarpal fracture. Post-operative 4^{th} and 5^{th} metacarpal support. Residual symptoms post fractured or sprained finger (of 4^{th} and 5^{th}).

Following strict plaster cast immobilisation

POINTS TO REMEMBER

Strict immobilisation of the wrist up to the 4th and 5th fingers: 2 conformable and removable stays with specific angulation (dorsal at 90° and palmar at 20°)

Comfort: Lightweight and breathable 3D fabric for prolonged wear. Protection of immobilised fingers thanks to interdigital separation

Easy to fit: full opening

15,5 - 17,5 cm 18 - 20 cm 20,5 - 23 cm

Colour: Black/Dark Blue

Presentation video available online

KNEE

FUNCTION OF KNEE BRACES AND KNEE SPLINTS

PROPRIOCEPTIVE KNEE BRACE

Improved proprioception via the use of a compressive knit

PATELLAR KNEE BRACE

Patella supported by the ring and proprioceptive effect thanks to the compressive knit

PATELLO-FEMORAL KNEE BRACE

Patella realignment in its physiological axis and proprioceptive effect thanks to compressive knit

LIGAMENT KNEE BRACE

Stabilizes the knee via the use of hinged reinforcements

OFFLOADING KNEE BRACE

Offload of the damaged compartment thanks to a 3-point system

KNEE SPLINT

Pain management and protective effect due to complete immobilisation of the knee

Did you know?

Knee injuries are often linked to sports.

For example, 1/3 of skiing injuries involve the knee¹

30%

of arthritis cases concern the knee joint²

^{(1) &}quot;L'accidentologie des sports d'hiver. Association des médecins de montagne". Winter 2012-2013. (2) Société Française de Rhumatologie. (2005). Report on osteoarthritis.

Which knee brace for which condition?

Which prescription?

Find all our products on the following pages.

GenuSoft

Proprioceptive elastic knee support (15 – 20 mmHg)

2320 03

Indicated for

Knee pain and/or swelling manage-

Propioceptive support for rehabilitation.

Target patient

Patient with limited activity

POINTS TO REMEMBER

Comfortable to wear: anatomically-shaped knit with comfort zone behind the knee

Proprioception: elastic compressive knit (15 - 20 mmHg)

Product

height

20 to 22 cm

GenuAction

Proprioceptive elastic knee support (20 – 36 mmHg)

2325 0

Indicated for

Joint instability/laxity.
Propioceptive support for rehabilitation

Target patient

Patient with moderate activity

POINTS TO REMEMBER

Comfortable to wear: anatomically-shaped knit with comfort zone behind the knee and over the kneecap

Proprioception: elastic compressive knit (20 - 36 mmHg)

GenuExtrem

Proprioceptive elastic knee support with lateral reinforcements (20 – 36 mmHg)

232102

Indicated for

Protection and prevention during sports activities.

Propioceptive support for rehabilitation.

Target patient

Patient with intense activity

POINTS TO REMEMBER

- **1-Comfortable**: anatomically-shaped knit with comfort zones behind the knee and over the kneecap
- **2 Support and hold**: flexible side stays with anti-slip system
- **3 Practical**: pull tabs for ease of application
- **4 Proprioception**: elastic compressive knit (20 36 mmHg)

Colour: Grey

Ligastrap® Genu

Ligament knee brace (20 – 36 mmHg) with functional strapping

2170 03

Indicated for

Joint instability/laxity. Knee pain and/or swelling management. Sport activities resumption.

Target patient

Resumption of sports, sport not authorised with rigid stays

POINTS TO REMEMBER

Reinforced support: double strapping system and flexible side stays

Comfortable to wear: anatomically-shaped knit with comfort zones behind the knee and over the kneecap

Practical: pull tabs and fitting guidance on the straps

Proprioception: elastic compressive knit (20 - 36 mmHg)

Product height 30 to 33 cm

•

2 35 - 37 cm 3 38 - 41 cm

4 42 - 45 cm

5 46 - 49 cm **6** 50 - 53 cm

Silistab[®] Genu

Knee brace with shock-absorbing patellar guide (15 - 20 mmHg)

2340 05 (white) - 2345 04 (black)

Indicated for

Knee pain and/or swelling management. Patella pain and instabilities. Knee osteoarthrosis (mild to moderate).

Target patient

Patient with limited activity Patient with mild knee osteoarthritis

POINTS TO REMEMBER

Patella support: anatomical insert

Joint support and hold: flexible side stays with anti-slip

Comfort: anatomically shaped knit, open behind the knee Proprioception: elastic compressive knit (approximately

Patellar bandage

Preventive orthotic

Indicated for

Prevention of tendinitis of the patellar tendon

Target patient

Patient taking part in sports with risk of recurrence

POINTS TO REMEMBER

Patella support: anatomical shape applying local pressure over the patellar tendon

Proprioception: silicone with dimpling for a massage effect

Unique size 26 - 50 cm Colour: Black

Patella Reliever

Hinged knee orthosis with patella traction system

2348 01

Indicated for

Femoro-patellar pain syndrome and/or patella instability. Femoro-patellar osteoarhritis (mild to moderate). Anterior knee or patella pain. Patella luxation and subluxation.

Target patient

Patient with pain behind the patella, for example after relatively prolonged sitting, when going down steps

♦ POINTS TO REMEMBER

Patella realignment: half-moon patellar insert with strap and lace kneecap traction system

Joint support: hinged stay

Hold: silicone integrated into the knit

Comfort: anatomically shaped knit with comfort zones

Practical: pull tabs for ease of application

2 models: right - left

Presentation video available online

Genu Dynastab®

Hinged ligament knee brace

2370 06

Indicated for

Conservative treatment of knee ligament injuries (lateral ligaments).
Joint instability/laxity.
Sport activities resumption.

Target patient

Resumption of sports, patient requiring moderate support

♦ POINTS TO REMEMBER

Joint support: bi-axial hinge

Hold: silicone integrated into the knit

Comfort: anatomically shaped knit with comfort zones

and half-straps to prevent any tourniquet effect **Practical**: pull tabs for ease of application

Colour: Grey

Genu Ligaflex®

Ligament knee brace with TM5 hinge

2375 06 (closed) - 2375 05 (open)

Indicated for

Conservative treatment of knee ligament injuries. Joint instability/laxity.
Knee pain and/or swelling management.
Sport activities resumption.

Target patient

Resumption of sports, patient requiring strong support

POINTS TO REMEMBER

Joint support: TM5 hinge reproducing the knee's natural movements*

Hold: silicone integrated into the knit and suspension strap above the calf

Comfort: anatomically shaped knit with comfort zones and half-straps to prevent any tourniquet effect

Practical: pull tabs and different versions to adapt to requirements (short and long version, open or closed model)

			14 cm

Genu Ligaflex® ROM

Ligament knee brace with flexion/ extension control

2386 05 (open)

Indicated fo

Conservative treatment of knee ligament injuries and/or ruptures (cruciate and/or lateral ligaments). Post-operative rehabilitation. Joint instability/laxity.

Target patient

Patient following severe sprain or during rehabilitation

♦ POINTS TO REMEMBER

Joint support: TM5+ hinge reproducing the knee's natural movements*

Range of motion control: tool-less limitation of flexion and extension with extensive adjustment range

 $\boldsymbol{\textbf{Hold:}}$ silicone integrated into the knit and suspension strap above the calf

Comfort: anatomically shaped knit with comfort zones and half-straps to prevent any tourniquet effect

Ligaflex® Immo

Modular immobilisation splint to fit all body shapes

2400 04

Indicated for

Knee pain management.
Post-operative and post-traumatic immobilisation.

Target patient

Difficult-to-fit patients

♦ POINTS TO REMEMBER

Immobilisation: 4 conformable stays

Hold: anti-slip system and tightening straps

Practical: 3 mobile side panels to fit most calf and thigh circumferences

Colour: Navy

-\(\)

Extra tip!

For the resumption of activities, recommend **Ligastrap® Genu** to protect the joint!

ROM-R

Post-operative splint with flexion/ extension limitation

U04602

Indicated for

Post-operative immobilisation or/and rehabilitation.

Post-traumatic immobilisation.

Joint instability/laxity.

Conservative treatment of knee ligament injuries and/or ruptures

Target patient

Patient with a severe ligament injury or post-operatively

POINTS TO REMEMBER

Immobilisation: 2 conformable lateral frames

Tool-less adjustment of the articulation, by 15° steps in flexion (from 0° to 120°) and extension (from 0° to 105°)

DropLock system can be locked by 15° steps from 0° to 90°

Tool-less length adjustment (proximal and distal)

Easy to use buckles

Rebel Standard Ligament

Off The Shelf

Patients who have experienced ligament injuries and/or reconstructive surgery. For rehabilitative or prophylactic use.

Features

- Stock sizes see chart
- Enhanced brace positioning via Townsend Motion TM5+ Hinge- tracks with the anatomical roll-and-glide motion of the knee to keep the brace properly positioned on the leg.
- Superior suspension via synergistic suspension strap
- Improved suspension via C/S package
- · Rotational control via tibial shell contour
- Suspension augmentation via anti-migration straps
- Easy donning via clip buckles
- Suitable for the majority of patients
- ACL configuration

Size	6" Above	M-L Knee Width	6" Below
XS	12.5 - 15.5 "	3 - 3.5"	11 - 12.5"

Rebel PRO Ligament

Custom

Patients who have experienced ligament injuries and/or reconstructive surgery. For rehabilitative or prophylactic use.

Features

- Optimised & customised fit Custom assembled to 3 leg measurements
- Enhanced brace positioning via Townsend Motion TM5+Hinge- tracks with the anatomical roll-and-glide motion of the knee to keep the brace properly positioned on the leg.
- Superior suspension via synergistic suspension strap
- Improved suspension via C/S package
- Rotational control via tibial shell contour
- Suspension augmentation via anti-migration straps
- Easy donning via clip buckles
- Suitable for heavy users and contact sports-rigid aircraft aluminium frame

Options

- Extension assist kit- suitable for patients who present with quadriceps weakness or fatiguable quadriceps
- Frame height options
- Frame configuration options
- Flexion Stop Kit
- Range of colours

Rebel Lock

Off The Shelf

Product Code: Standard - U30202 Semi-Custom - U30201

Indications

- Patients with signicant instabilities; weak extensor muscles, failed TKR, limiting or preventing knee flexion.
- A lightweight option for patients who need stability and functionality to control signicant instabilities.

Features

- Superior suspension via synergistic suspension strap
- Improved suspension via C/S package
- · Rotational control via tibial shell contour
- Suspension augmentation via anti-migration straps
- · Lightweight Aircraft Aluminium Frame
- Drop Lock With Free Motion
- Adjustable Locking Position

Options

- Optimised & customised fit Custom assembled to 3 leg measurements
- Extension assist kit suitable for patients who present with quadriceps weakness or fatiguable quadriceps
- Frame height options
- Flexion stops at 30, 60, or 90 degrees
- Range of colours (stock frame colour is black)

Extension Assist

This optional extension assistance mechanism uses strong latex bands slipped over two posts - one proximal and one distal - to the knee centre. There is no limitation in flexion.

Sprystep Knee Orthosis (KO)

Custom

Strong, thin and lightweight. Custom knee orthoses that are elegant and functional.

Features

- The Sprystep Knee Orthosis leverages advanced composite materials to provide elegant and high quality solutions.
- Varied geometry options dependent upon the biomechanical aim
- Moderate stiffness with the option to reinforce.
- Anatomical contours for comfort on force pattern application
- · Extremely lightweight and thin
- Full range of Townsend joints are applicable.
 Requests can be made for TM5, Single Pivot,
 Five Bar with accessories such as trigger release,
 twist cable or bump and range stops.

ActionReliever

Off-loading knee brace for the treatment of knee osteoarthritis

2349 01

Indicated for

Symptomatic unicompartimental femorotibial osteoarthritis (mild to moderate).

Knee off-loading for post-traumatic, post-operative or degenerative conditions.

Knee pain and/or swelling management.

Target patient

Patient with mild to moderate pain. Patient with moderate activity

> POINTS TO REMEMBER

Offloading of the injured compartment: 3-point support system thanks to inelastic straps that ensure maximum offloading of the knee in extension

Stabilisation of the joint: rigid joint on the injured side and flexible on the healthy side and patellar silicone insert

Support and comfort: silicone integrated into the knit and anatomical knitting with comfort areas

Available in medial left / lateral right and medial right / lateral left

Right Leg Medial

ActionReliever

Three point Pressure System

The Thuasne ActionReliever is an off-loading brace that has been designed to apply corrective forces on the leg to reduce the load of the compartment affected by osteoarthritis (referred to as three point pressure).

By helping hold the leg in a normal alignment and maintaining a homogeneous load on the knee joint as a whole, the ActionReliever knee brace will help reduce compression and

inflammation. This load reduction is proven to relieve pain.

♦ POINTS TO REMEMBER

Dynamic Off-Loading

- Straps creating a dynamic three point pressure system: most effective on heel strike.
- Combined rigid adjustable hinge on the affected side and flexible stay on the unaffected side.
- Self adjustment possible by tightening the front straps.
- For medial or lateral osteoarthritis.

Ease Of Use

- Only two steps for fitting.
- · Easy to put on and take off.

Comfort

- Anatomically shaped straps, self-oriented and adjustable.
- Anatomical knitting with no compression areas at popliteal crease and at brace edges.
- Stays comfortable all day.
- · Slim and discreet under clothing.

Patients with Knee Osteoarthritis

Randomised Controlled Study with 32 Patients on 8 Weeks:

17 bracing group, 15 control group*

Main Objective:

Effect of the brace on the pain free walking distance

"By wearing the brace, the pain on exertion was reduced and the pain-free distance extended*"

*Benning M, Schneider-Nieskens R; Superiority of a Knee Relief Orthosis in the Treatment of Knne Osteoarthritis. Orthopädie Technik 08/17: 24-30

The following Action Reliever videos are available on Voulube by scanning the QR code: testimonial, measuring, practitioner fitting, patient fitting.

Rebel Reliever®

Off-loading knee brace

U03309

Indicated for

 $\label{eq:moderate} Moderate \ to \ severe \ unicompartment \ femoral-tibial \ osteoarthritis \ of \ the \ knee.$

Unicompartment knee joint degeneration requiring offloading. Post-operative offloading of a single compartment (articular or meniscus cartilage defect or osteochondral defect).

Knee joint instability after injury or surgery on the cruciate and/or collateral ligaments (ACL, PCL, LCL, MCL).

Target patient

Arthritic patient requiring maximum offloading

POINTS TO REMEMBER

Offloading of the damaged compartment: 3-pressure point system with Loadshifter system

Freedom of movement: TM5+ hinge reproducing the knee's natural movements.*

Open zone at the back of the knee

Hold: suspension strap above the calf and specially shaped tibial shell to prevent rotation

Comfort: inner foam lining

Practical: fitting buckle and tool-less adjustment of offloading level (Snap lock system)

2 models: right and left

Slide

The patented LoadShifter mechanism and tool-less SnapLock are innovative features incorporated into the femoral section of Townsend's Rebel Reliever™, Premier Reliever and Reliever Air rigid OA knee braces. By releasing the SnapLock, the fitter can utilize the LoadShifter to adjust the angle of the thigh shell. Increasing corrective pressure at the top of the leg amplifies the three-point counterforce at the knee and distal end of the brace — improving leg alignment and reducing compressive load on the damaged side of the knee.

Lock

Clinically Proven to Reduce Pain & Improve Quality of Life

Studies show Rebel Reliever reduces pain and symptoms of OA, improves balance and muscle function, and provides immediate, positive impacts to quality of life for patients.

Stony Brook University Study

Studies demonstrate a reduction of pain and symptoms of OA, improved balance confidence and average daily living participation, and an overall improvement in quality of life.

ANKLE

FUNCTION OF ANKLE BRACES, ANKLE STIRRUPS AND WALKING BOOTS

PROPRIOCEPTIVE ANKLE BRACE

Improved proprioception (perception of the body in space) via the use of a compressive knit

LIGAMENT ANKLE BRACE

Holds the ankle in an anatomical position using elastic

ANKLE STIRRUPS

Analgesic and protective action through a firmer immobilisation of the ankle. Its compressive effect can help reduce oedema

WALKING BOOT

Analgesic action through immobilisation of the ankle, reduction of the oedema thanks to adjustable compression, also suitable for managing post-operative treatment

Did you know?

6,000 people consult a health professional

every day for an ankle sprain, i.e. 250 per hour¹

Athletes and young people who are still growing are the most affected

ANKLE | Which brace for ? which condition?

Which prescription?

Find all our products on the following pages.

MalleoSoft

Proprioceptive elastic ankle support (about 17 mmHg)

3600 02

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.

Proprioceptive support for rehabilitation. Sport activities resumption. Compression for scar/burns healing.

Target patient

Patient with limited activity

> POINTS TO REMEMBER

Proprioception: elastic compressive knit (about 17 mmHg)

Comfort: anatomical knitting with comfort areas on the malleolus

Colour: Sliver

MalleoAction

Proprioceptive elastic ankle support (about 22.5 mmHg)

23610

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.

Proprioceptive support for rehabilitation. Sport activities resumption. Compression for scar/burns healing.

Target patient

Patient with moderate activity

POINTS TO REMEMBER

Proprioception: elastic compressive knit (about 22.5 mmHg)

Comfort: anatomical knitting with comfort areas on the malleolus

Practical: pull tabs for ease of application

Colour: Grey

Silistab[®] Malleo

Proprioceptive anatomic protective ankle brace (about 21 mmHg) for the malleoli

2365 01

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.
Proprioceptive support for rehabilitation.

Sport activities resumption.
Compression for scar/burns healing.

Target patient

Patient with moderate activity

POINTS TO REMEMBER

Proprioception: elastic compressive knit (about 21 mmHg)

Comfort: anatomical knitting

Specific protection: silicone inserts protect the malleoli and instep

Colour: Black

Silistab[®] Achillo

Proprioceptive achilles tendon ankle support (about 23 mmHg)

2355 03

Indicated for

Conservative treatment of Achilles tendon rupture.
Post-operative, post-traumatic pain and/or oedema of the Achilles tendon.

Prevention of sports injuries of the Achilles tendon. Prevention/treatment of Achilles tendon conditions (tendonitis, tenosynovitis, bursitis, achillodynia, Haglund's disease).

> POINTS TO REMEMBER

Offloading of the Achilles tendon: stackable silicone heel pieces permitting 3 offloading heights (5, 8 or 13 mm)

Tendon protection and relief: peri-Achilles insert

Comfort: comfort zone over the malleoli

Practical: pull tabs for ease of application

Proprioception: elastic compressive knit (approximately

23 mmHg)

Colour: Grey

Presentation and fitting video available online

Malleo Dynastab® BOA®

Stabilising ankle-immobilising brace with BOA® fit system

2351 02

Also available with lace-up fastening:

Malleo Dynastab[®] Stabilising ankle brace 2350 03

Indicated for

Ankle immobilisation.

Conservative treatment of Achilles tendon injuries.

Joint laxity/chronic instability prevention during sport activities resumption.

Moderate to severe ankle sprain.

Sport activities resumption.

Tendinopathy treatment.

Target Patient

Patients practicing pivot sports (basketball, volleyball, handball...)

POINTS TO REMEMBER

- **1 Increased ankle stabilisation**: lightweight metal reinforcements and strapping
- **2 Easy fastening**: BOA® Fit System for even tightening that does not loosen over time
- **3 Easy fitting**: wide opening to make it easier to put on and take off
- **4 Comfort**: slim, anatomical design so that it can be worn in most types of shoes. Micro-ventilated 3D knit to wick away moisture

	Malleo Dynastab® BOA

3	26 - 30 cm

Colour: Grey

Ligastrap® Malleo

Proprioceptive ligament ankle brace (about 27.5 mmHg) with functional strapping

2180 04

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.
Proprioceptive support for rehabilitation.

Sport activities resumption. Compression for scar/burns healing.

Target Patient

Patients practicing linear sports

POINTS TO REMEMBER

Support: double stabilising strap for lateral ligaments and additional strap for light eversion

Proprioception: elastic compressive knit (about 27.5 mmHg)

Comfort: anti-slip on the calf

Colour: Grey

XLR8

Rigid shell walking boot with inflatable inserts

U08903 (long) - U09003 (short)

Indicated for

Ankle/foot post-operative/post-traumatic immobilisation. Severe ankle/foot sprain.

Stable fracture of the lower third of the leg (tall version).

Conservative treatment of ankle/foot fracture. Ankle/foot severe tendinopathy.

Conservative treatment of Achilles tendon rupture.

♦ POINTS TO REMEMBER

Strict immobilisation: integral rigid shell

Adjustable: air cells integrated into the boot to adjust the pressure according to the oedema and for an optimal anatomical adaptability

Comfort: curved anti-slip sole for a natural and comfortable walk and protection of the toes thanks to

the adjustable arch (3 positions)

Bilateral model.

Two version: Short and Long

XS	< 3

Ligastrap[®] Immo

Stabilising ankle stirrup with support strapping

2337 02

Indicated for

Ankle immobilisation.

Conservative treatment of Achilles tendon injuries.

Moderate to severe ankle sprain.

Post-operative, post-traumatic residual pain and/or oedema

Sport activities resumption.

POINTS TO REMEMBER

Support: rigid lateral shells with asymmetrical hollows for the malleoli and additional reinforcement thanks to the removable strap

Easy to fit: closure with pulley system and self-fastening straps

Colour: Black

Ligacast® Air +

Ankle stirrup with inflatable pads

2334 01

Indicated for

Ankle immobilisation.

Conservative treatment of Achilles tendon injuries. Moderate to severe ankle sprain.

POINTS TO REMEMBER

Immobilisation: lateral rigid shells

Comfort: inflatable inserts with inflator bulb (included) for morphological adaptation after fitting the splint

Easy to fit: self-fastening straps and adjustable calcaneal strap

SINGLE SIZE

Bilateral version

Colour: White/blue (

Which solution for which condition

SpryStep® Range: DYNAMIC ANTERIOR AND POSTERIOR ANKLE-FOOT ORTHOSIS (AFO)

SpryStep® a complete range for patients suffering from lower limb weakness

Defined by elegance, Thuasne's SpryStep® range of AFOs is transforming the way people move. Using a proprietary blend of composite materials, the SpryStep® comes in a variety of solutions that are improving mobility and quality of life for patients.

Sprystep Ortho-Neuro Solutions catalogue available – To visit the online catalogue please scan the QR code below.

SpryStep® Vector

Customizable in shape and stiffness the SpryStep® Vector offers superior control for the most complex conditions and patients.

Custom SpryStep®

Custom shape, molded inner boots and pre-tib shell options take the SpryStep®, SpryStep® Flex and SpryStep® Plus to the next level.

SpryStep® OTS

With Five different models, the SpryStep® OTS range addresses a wide array of indications with variations in strut placement, ground reaction force and stiffness.

SpryStep® flex

Posterior dynamic ankle-foot orthosis

U01712

Indicated for

Foot drop of neurological origin from central nervous system, peripheral nervous system or muscular origin without knee

Target patient

Patient with mild weakness of the lower limb (weakness of the anterior tibial muscle)

Patient with dynamic activities (fast walking, running, unstable surface...).

POINTS TO REMEMBER

Lightweight and durable composite structure designed with a unique combination of different materials blend and a precise manufacturing process.

The variety of materials used provides the patient with a good balance between flexibility and rigidity to improve gait cycle and to offer greater energy return

The 180° spiral strut provides great flexibility and allows an optimal energy return, ideal for people with intensive physical activity.

SpryStep®

Dynamic ankle-foot orthosis

U01703

Indicated for

Foot drop of neurological origin, traumatic origin or muscular origin.

Target patient

Patients with mild to moderate weakness of the lower limb (weakness of the anterior tibial muscle)

Patient with moderate activity (walking on a flat surface)

POINTS TO REMEMBER

Lightweight and durable composite structure designed with a unique combination of materials blend and a precise manufacturing process.

The variety of materials used provides the patient with a good balance between flexibility and rigidity to improve gait cycle and to offer a rebound effect.

Posterior lateral position of the strut to optimise compliance and energy restitution during physical activity.

Presentation and fitting video available online

SpryStep® plus

Spiral anterior shell dynamic ankle-foot orthosis

Indicated for

Lower limb weakness of neurological, traumatic or muscular origin

Target patient

Patients with mild to moderate weakness of the lower limb (weakness of the anterior tibial muscle)

POINTS TO REMEMBER

Anterior carbon structure that supports and guides the knee towards extension, helps the weakened plantar flexors to propel and support the knee during the extension phase.

The variety of materials used allows the patient to have a good balance between flexibility and rigidity to improve gait and allow the tibia to be tilted during the support phase.

Posterior lateral position of the strut to optimise compliance and energy restitution during physical activity.

SpryStep® max

Anterior shell dynamic ankle-foot orthosis

Opposing force

Stabilising

Indicated for

Lower limb weakness of neurological, traumatic or muscular origin

Target patient

Patients with mild to moderate weakness of the lower limb (weakness of the anterior tibial muscle and gastrocnemius muscle)

Lower activity level.

POINTS TO REMEMBER

Anterior carbon structure that supports and guides the knee towards extension, helps the weakened plantar flexors to propel and maintain the knee during the support phase.

The rigidity of the structure combined with the flexibility of the sole **provides great stability and energy return**

Lateral position of the upper, anterior to the malleolus, **to** allow easy insertion into the shoe.

Dynamic devices, length-adjustable by cutting of the sole by the healthcare professional

Presentation and fitting video available online

Pero-med AFO III/II

Peroneal orthosis

T479652

Indicated for

Mild to medium foot lifting weakness, mild peroneal paresis of the IIIrd and IInd degree without spasticity

POINTS TO REMEMBER

Effective right-angle foot support to secure the walking motion

Extra comfort thanks to its anatomical shape and light weight

Its design allows it to be worn with all types of flat shoes

Colour: White

Podo-med T500501 **Heel offloading shoe**

POINTS TO REMEMBER

Offload: wedge shaped base with dorsal flexion at 10° Comfort: seamless interior to avoid pressure areas

Easy to fit and care: complete opening of the shoe and adjustment by self-fastening straps

		Shoe size	Foot length	
1	S	2 - 4	22 - 23 cm

2430 02

Ortel C1 junior

Light cervical collar

2620 001 004

Indicated for

Torticollis, mild whiplash / mild sprain, cervical osteoarthritis, dropped head syndrome, post-operative use, cervical syndrome, rehabilitation after wearing a rigid cervical collar.

POINTS TO REMEMBER

Modular support: high quality foam with removable rigid reinforcement

Support: precise adjustment with self-fastening closure

Colour: Blue

Ligaflex[®] junior

Clavicular immobilisation straps

2640 02

Indicated for

Displaced or non-displaced clavicle fractures.

POINTS TO REMEMBER

Adaptability: trimmable straps to fit all patients (one size fits all)

Easy to fit: self-fastening system and buckle closure

Comfort: dorsal foam anchoring pad and quilted straps

Universal size (shoulder width < 34 cm)

Unique size

Colour: Blue

Ligaflex® Classic

Wrist immobilisation splint

2435 02

Indicated for

Wrist sprain.

Non-surgical wrist fracture. Post-operative or post-traumatic wrist

immobilisation.

Wrist tendinopathies.

Conservative treatment of carpal tunnel syndrome.

Lateral epicondylitis.

Rheumatoid arthritis

Wrist osteoarthritis.

Indicated for Thumb sprain.

Wrist and/or thumb sprain. Non-surgical scaphoid fracture.

Ligaflex® Manu

Wrist and thumb immobilisation splint

Non-surgical wrist fracture.
Post-operative or post-traumatic wrist/

thumb immobilisation.

Wrist and/or thumb tendinopathies.

De Quervain tenosynovitis.

Rheumatoid arthritis.

Lateral epicondylitis.

Conservative treatment of carpal

tunnel syndrome.

Thumb/wrist osteoarthritis.

Neuro-muscular impairments (contracture, hand drop or spasticity...).

Wrist immobilisation: via a rigid, malleable and anatomical palmar stay

Thumb immobilisation: via a rigid, malleable thumb stay

2325 03

Ligaflex Immo 0°

Knee immobilisation splint at 0° 2410 04

MalleoAction

Proprioceptive elastic ankle support

2361 03

Indicated for

Knee pain and/or swelling management Joint instability/laxity

Propioceptive support for rehabilitation Conservative treatment of mild knee ligament injuries.

Indicated for

Post-operative immobilisation. Post-traumatic immobilisation. Knee pain management.

♦ POINTS TO REMEMBER

Anatomically-shaped knit

Comfort zones over the patella and at the back of the knee

Class 3 compression level (French standard: 20-36mmHg /27,1-48 hPa) ensures good support and proprioception

Colour: Dark blue/Grey

♦ POINTS TO REMEMBER

Knee joint stabilisation via rigid stays Total immobilisation at 0°

Adjustable closure and support via self-fastening straps

Colour: Navy

♦ POINTS TO REMEMBER

Proprioception: elastic compressive knit (about 22.5 mmHg)

Comfort: anatomical knitting with comfort zone over the malleoli

Practical: pull tabs for ease of application

Indicated for

Joint instability/laxity.

pain and/or oedema.

Sport activities resumption.
Compression for scar/burns healing.

Mild ankle sprain (acute phase).

Post-operative, post-traumatic residual

Proprioceptive support for rehabilitation.

Ligacast® junior

Stabilising ankle brace with foam inserts

2600 001 004

Paediatric Walker

Paediatric walking boot with rigid side uprights

U08801

Indicated for

Ankle Immobilisation.

Conservative treatment of Achilles tendon injuries.

Joint laxity/chronic instability prevention during sport activities resumption. Moderate to severe ankle sprain. Sport activities resumption.

Tendinopathy treatment.

Target patient

Patients practicing pivot sports (basketball, volleyball, handball...)

Indicated for

Ankle Immobilisation. Conservative treatment of Achilles tendon injuries.

Moderate to severe ankle sprain.

Indicated for

Post-operative or post-traumatic immobilisation of the ankle or foot. Severe ankle and/or foot sprains. Stable fractures of the lower third of the

Conservative treatment of ankle and/or foot fractures.

> POINTS TO REMEMBER

Ankle stabilisation: lightweight, lateral reinforcements and strapping for stability and immobilisation

Easy fastening: BOA® Fit System for a custom fit and even compression

Easy fitting: wide opening for ease of application and removal

Comfort: slim, anatomical design, fits easily in most types of shoes

POINTS TO REMEMBER

Immobilisation of the ankle: lateral rigid shells

Comfort: padded foam inserts

Easy to fit: adjustment by self-fastening straps

Adaptability: height-adjustable calcaneal strap for adaptation to the patient's morphology

POINTS TO REMEMBER

Extra sturdy design for active kids

Rigid uprights provide protection and immobilisation of the injured limb

Lightweight structure reduces impact on gait pattern

Wide and anti-slip sole increases stabi-

THUASNE SPORT

Lumbar support belt

036101

Indications: Non-specific low back pain (acute, subacute and chronic phases). Spinal stenosis

Properties: ventilated elastic fabric

Neoprene shoulder padding

0576 03

Indications: Conservative treatment for non-surgical proximal humeral fractures Post-operative immobilisation (such as after rotator cuff surgery or dislocation reduction...) Shoulder and/or elbow injuries or inflammatory

Shoulder dislocation Shoulder subluxation or dislocation prevention (joint instability) Support for paralytic upper limb

Thermal insulation: neoprene

Anatomical fit: elastic knit coating

Anti-epicondylitis elbow brace

Indications: Treatment of lateral or medial epicondylitis (tennis/golfer's elbow).
Prevention of elbow tendinopathy recurrence. Support for physical activity resumption

Modular product: prevention and acute pain

Evaporation of perspiration: perforated

Anatomical fit: anatomically shaped cut-outs

Elbow support

(sport or work activities).

0338 01

Indications: Treatment of lateral or medial epicondylitis (tennis/golfer's elbow. Tendinopathy treatment. Prevention of recurrence. Helps prevent pain during excessive effort

Compressive knit: improved proprioception

Comfort zone: easy centring of the elbow

Enhanced stretch: provides greater comfort, avoids excessive thickness

Tennis elbow armband

Indications: prevention of tendinitis of the elbow lateral epicondylitis (tennis elbow) or medial epicondylitis (golfer's elbow)

Properties: two silicone inserts provide localised compression and reduce tension on the elbow

Strapping thumb brace

Indications: Immobilisation in case of pain or trauma of the thumb.
Post-operative immobilisation.
Thumb osteoarthritis (including rhizarthrosis).

Fragile thumb ligaments Wrist/thumb

support: elastic straps Evacuation of perspiration: perforated

Anatomical fit: anatomical shapes

Braces

Upper LIMBS

Strapping wrist band

0340 02

Indications: prevention of ligament injuries. Resumption of activities after injury

Reinforces the wrist: strong compression strap Evaporation of perspiration: breathable strap Anatomical fit: one size only

Neoprene wrist support

0575 03

Indications: Wrist tendinopathies. Wrist sprain. Wrist osteoarthritis. Rheumatoid arthritis.

Reinforced support: complete cover

Thermal insulation: neoprene

Anatomical fit: elastic knit coating

Wrist immobilisation brace with BOA® Fit System

03560

Indications: Wrist sprain. Wrist osteoarthritis. Rheumatoid arthritis.

Properties: firm support of wrist in correct position (anatomical and conformable stay). BOA® closure system for easy, uniform tightening

Optimum comfort: ventilated fabric, inner foam lining

Boa® is a registred trademark of Boa® Technology Inc.

One size only

THUASNE SPORT

Patellar bandage

0329 01

Indications: Patella joint or ligament inflammation and tendinopathy (runner's knee and jumper's knee syndrome) Mild patella joint instabilities Anterior knee or patella pain.

Stimulation of proprioception: silicone combined with the fabric band

Neoprene thigh support

0572 03

Indications: muscle tears in the acute phase or during the physiotherapy phase. Muscle pulls. Muscle strains

Thermal insulation: neoprene

Neoprene knee support

0573 03

Indications: prevention of ligament injuries (sprains). Resumption of activities after a sprain. Weak knee ligaments

Thermal insulation: neoprene

Stimulation of proprioception: elastic knit

One size only

Knee support

U334 U

Indications: gentle support for fragile or painful joints (mild sprains, etc.)

Compressive knit: improved proprioception Comfort zone: easy centring of the kneecap Enhanced stretch: provides greater comfort, avoids excessive thickness

Open knee support

030701

Indications: gentle support for fragile or painful joints (mild sprains, etc.)

Compressive knit: improved proprioception

Patellar opening: aids centring of the kneecap

Reinforced knee support

03540°

Indications: chronic knee instability (cruciate ligament rupture). Resumption of sporting activities following mild knee sprains and injuries (including surgery)

Properties and specific characteristics of the product: the elastic knit exerts uniform pressure on the joint and improves proprioception (the joint's sensory perception

Comfort zone over the kneecap and the crease behind the knee. Flexible lateral stays ensure good support

Lower LIMBS

Open strapping knee brace

Indications: functional treatment of mild to

medium knee sprains. Resumption of activities. Lateral and cruciate ligament sprain.

Chronic instability of the knee

Properties: total opening for an easy fitting. Anatomical 3D design. Elastic crossed and adjustable straps for a dynamic and lateral support. Flexible side stays. Aerated popliteal area. Breathable perforated neoprene, with heating effect

Novelastic knee strap

Indications: functional treatment of mild to medium knee sprains.
Resuming activity after a severe sprain

including surgery

Properties: practical cross-over straps to strengthen the lateral support.
Flexible lateral frame for better stability.
Comfortable knitted patch at the kneecap and the popliteal area

Reinforced knee support

Indications: prevention of ligament injuries (sprains). Resumption of activities after a sprain. Weak knee ligaments

Thermal insulation: neoprene

Stimulation of proprioception: elastic knit

Better joint support: lateral stays

Reinforced patellar knee brace

Indications: patellar tendinitis and cartilage

pain in the kneecap.
Mild sprain of the lateral ligaments of the knee. Resumption of sporting activities following mild knee sprains and injuries

Properties: comfort and guiding zone at the kneecap (patellar ring). Comfort zone at the back of the knee.
Flexible side stays ensuring good support

Neoprene ankle support

Indications: prevention of ligament injuries

(sprains). Resumption of activities after a sprain. Weak ankle ligaments

Thermal insulation: neoprene

Stimulation of proprioception: elastic knit coating

Open ankle support

030602

Indications:

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or œdema.
Proprioceptive support for rehabilitation.
Sport activities resumption.

Compressive knit: improved proprioception Heel opening: aids centring of the heel

Compression for scar/burns healing

Lower LIMBS

Ankle support

0333 03

Indications: Joint instability/laxity. Mild ankle sprain (acute phase). Mild ankie sprain (acute phase).

Post-operative, post-traumatic residual pain and/or ædema.

Proprioceptive support for rehabilitation.

Sport activities resumption.

Compression for scar/burns healing.

Compressive knit: improve proprioception Comfort zone: easy centring of the malleolus

Enhanced stretch: provides greater comfort, avoids excessive thicknesses

Novelastic ankle strap

028002

Indications: Joint instability/laxity. Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or cedema.

Proprioceptive support for rehabilitation. Sport activities resumption. Compression for scar/burns healing.

Properties: two-way support straps "in an 8" (for a sprain of the lateral collateral or medial collateral ligament) protecting the flexion-

Extra thick sole for more comfort

Reinforced ankle support

Indications.
Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or ædema.
Proprioceptive support for rehabilitation.

Sport activities resumption.

Compression for scar/burns healing.

Properties: the elastic knit exerts uniform pressure on the joint and improves proprioception (the joint's sensory perception). Comfort zone over the malleolus

Stabilising ankle brace Boa®

Indications: Ankle immobilisation Conservative treatment of Achilles tendon

Joint laxity/chronic instability prevention during sport activities resumption Moderate to severe ankle sprain Sport activities resumption Tendinopathy treatment

Properties: rigid side reinforcements to ensure ankle stability. BOA® Fit System: fast and reliable.
Slim product that fits easily inside a shoe

Indications: Joint instability/laxity. Mild ankle sprain (acute phase). Post-operative, post-traumatic residual pain and/or cedema.
Proprioceptive support for rehabilitation.
Sport activities resumption.
Compression for scar/burns healing.

Perfect support for the ankle: elastic straps **Evacuation of perspiration**: perforated

Anatomical fit: adjustable neoprene Tab

Relieves pain

Hot pain relief

Cold pain relief

Extra tip!

Self-adhering strap to fit all.

Attached to itself

INDICATED FOR

Hot pain relief:

Back pain, joint and muscle stiffness, spasms, cramps, torticollis, abdominal pain

Cold pain relief:

Sprains, tendinitis, toothache, bruises, strains, migraines, eye pain, arthritis

POINTS TO REMEMBER

Adaptability:

Ergonomic, easily conformable pack thanks to the clay's density

Reusable, washable, velvet-touch protective sleeve Elastic self-adhering straps to fit all

Size	Recommended uses	Dimension (cm)
Size 1	Wrist - Elbow - Face	19 x 11
Size 2	Ankle - Elbow - Knee	26 x 13
Size 3	Knee - Back - Abdomen	30 x 20
Size 4	Neck - Shoulder - Back	43 x 17
